1 Introduction

These Release Notes provide an overview of Intelligent Capture for Invoices CE 22.3, including new features, delivery information, and supported platforms. OpenText recommends that you read these Release Notes in conjunction with the documentation included with the software package. If any conflicts exist, the Release Notes supersede the other documentation.

We also recommend that you check OpenText My Support (<https://support.opentext.com>) for any patches or documentation updates that may have been posted after the initial release of this product.

1.1 Release Notes revision history

Revision date	Sections revised	Description of revisions
2022-08-17	First release.	All new content.

2 About Intelligent Capture for Invoices

This section provides an overview of Intelligent Capture for Invoices CE 22.3.

Intelligent Capture for Invoices transforms paper invoices into digital images, automatically capturing invoice data, validating it, and delivering it into workflow processes and content management and Enterprise Resource Planning (ERP) systems. Configure Intelligent Capture for Invoices using the Invoice Application Customizer tool to match your business needs.

Intelligent Capture for Invoices:

- Enables operators to view digital images of invoices to validate and correct captured data. Field edits verify data and populate fields based on configurations set in Invoice Application Customizer.
- Assigns a company code to batches and creates digital invoices.
- Processes single page invoices, multiple page invoices, and invoices with attachments.
- Enhances, deskews, scales, and removes noise to improve data capture.
- Classifies invoices to vendor specific or free form templates.
- Extracts and perfects invoice data using predefined business rules and sophisticated recognition to perform free form data capture.
- Matches invoice items to purchase order items stored in the ERP system.
- Supports invoices that are submitted for blanket purchase orders.
- Supports auto-learning to create new vendor-specific templates using the Production Auto-Learning (PAL) feature.
- Exports images and critical business data to external ERP systems such as ODBC-compliant databases and SAP systems.

For additional information, refer to the *Intelligent Capture for Invoices Guide*.

2.1 New and changed features

The Intelligent Capture for Invoices CE 22.3 release does not include any new features.

2.2 Discontinued and deprecated features

The Intelligent Capture for Invoices CE 22.3 release does not include any discontinued and deprecated features.

3 Packaging and documentation

Software downloads and documentation for Intelligent Capture are available on OpenText My Support (<https://support.opentext.com>). Hosted helps are available through the OpenText Global Help Server (GHS).

Note

Documentation that is installed with the product or packaged with the product download is current at the time of release. Documentation updates made after a release are available for download on OpenText My Support (<https://support.opentext.com>).

3.1 Packaging and delivery information

The software and documentation for Intelligent Capture for Invoices includes:

- **Start > OpenText Intelligent Capture for Invoices > Intelligent Capture for Invoices Help**
C:\Program Files (x86)\InputAccel\ Documentation\HelpLauncher\HelpLauncher.exe
Main help for the entire Intelligent Capture for Invoices Help system

4 Supported environments and compatibility

This section provides details about supported platforms, systems, and versions.

Notes:

- A product configuration running on a particular environment is supported as long as versions of the components in the environment (e.g., operating system, database, web server, browser, SSO, Directory Servers, etc.) are in standard/primary support by their vendors.
- Software requirements are listed with release numbers. Software updates—including patches, Service Packs, and equivalent updates—sometimes introduce unanticipated changes. Compatibility with software updates that are not listed here cannot be guaranteed.
- All certifications provided in this document are relevant to the current release. Certifications for patches are documented in the Patch Notes documents published for the patch releases.

4.1 Supported systems

4.1.1 Database system

Intelligent Capture for Invoices requires the Invoice Capture Database (IAIDB). The requirements for the Invoice Capture Database are the same as the requirements for the Intelligent Capture Database. These requirements are listed in the *Intelligent Capture Release Notes*.

The Intelligent Capture for Invoices Shared Files feature includes the option to install IAIDB.

4.1.2 Server system

Intelligent Capture for Invoices requires the Intelligent Capture Server. For the full list of requirements for the Intelligent Capture Server, refer to the *Intelligent Capture Release Notes*.

4.1.3 Client system

The Intelligent Capture client machine requirements are listed in the *Intelligent Capture Release Notes* and these are the same requirements to install the client framework for Intelligent Capture for Invoices.

4.1.4 Web Components

Invoice Application Customizer supports the following Internet Information Services versions:

IIS version	IIS Roles to be enabled for this version:
<ul style="list-style-type: none"><li data-bbox="301 1122 429 1151">• IIS 7.0<li data-bbox="301 1173 429 1202">• IIS 7.5	<ul style="list-style-type: none"><li data-bbox="798 1122 1254 1151">• IIS Management Scripts and Tools<li data-bbox="798 1173 1129 1202">• Windows Authentication<li data-bbox="798 1225 954 1254">• ASP.NET<li data-bbox="798 1276 1054 1305">• .NET Extensibility<li data-bbox="798 1328 1050 1357">• ISAPI Extensions<li data-bbox="798 1379 995 1408">• ISAPI Filters

4.2 Language support

Intelligent Capture for Invoices is currently localized in the following languages. Additional languages may be available in future releases.

Component	Languages									
	EN	DE	ES	FR	IT	JA	KO	PT	RU	ZH
Intelligent Capture for Invoices components	B	B	B	B	B	B	B	B	B	B
Intelligent Capture for Invoices installer	B	-	-	-	-	B	-	-	-	-
Invoice Application Customizer	B	UI	UI	UI	UI	UI	UI	UI	UI	UI
Invoice Export module	B	UI	UI	UI	UI	UI	UI	UI	UI	UI

UI = user interface strings, including windows, panes, menu items, buttons, and error messages
B = both user interface and online help

5 Installation and upgrade

This section contains instructions for installing and upgrading Intelligent Capture for Invoices.

Before beginning installation, ensure that your system meets the requirements listed in [4 Supported environments and compatibility](#). After installation, be sure to update your OpenText product to the latest patched release, if any patches are available.

5.1 Installing Intelligent Capture for Invoices

For the detailed information on installing Intelligent Capture for Invoices, refer to the *Intelligent Capture for Invoices Installation Guide*.

5.2 Upgrading Intelligent Capture for Invoices

You can upgrade to Intelligent Capture for Invoices 22.3 from versions 22.X, 21.4, 20.2, 16.6, 16.5, 7.7. For the detailed information on upgrading Intelligent Capture for Invoices, refer to the *Intelligent Capture for Invoices Installation Guide*.

6 Fixed issues

There are no past issues that have been fixed in this release.

7 Known issues

Intelligent Capture for Invoices CE 22.3 release does not include any known product issues and limitations that may affect your use of the product.
